Introducción

En este capítulo se definen los eventos generados en un sistema sanitario, dentro del módulo de consultas externas (CEX) y de Hospital de día (HDD), que engloban los eventos relacionados con la programación y realización de la actividad en estos ámbitos.

Estos eventos comúnmente se utilizan para poder conocer el estado de las agendas del hospital, y poder elaborar la lista de trabajo en los distintos departamentos.

Circuitos

Estos son los circuitos más comunes, dentro de CEX.

Episodio ambulatorio de consultas externas

En una consulta externa, el flujo general sería el siguiente:

Evento HL7	Evento	Actor	Acción
SIU-S12	Nueva cita	Administrativo	Programar la actividad
ADT-A04	Recepción	Administrativo	Registrar la recepción del paciente que
AD1-A04	del paciente	Aummstrativo	acude a su cita
ADT-A14	Llamada a	Facultativo	Llamada al paciente en la sala de espera
ADI-AI4	consulta	racuitativo	para que entre en consulta
ADT-A01	Inicio de la	Facultativo	Registrar la entrada del paciente a la
ADI-A0I	cita	racuitativo	consulta
ADT-A03	Fin de cita	Facultativo/	Registrar la captura de la actividad en la
AD1-A03	Till de Cita	Administrativo	cita realizada

Las anulaciones de estos movimientos son:

Evento HL7	Evento	Actor	Acción
SIU-S15	Anulación de cita	Administrativo	Anular la programación de cita
ADT-A11	Anulación de recepción	Administrativo	Anular el registro de recepción
ADT-A13	Anulación de Captura	Facultativo	Anular el registro de captura

Tratamientos de Hospital de Día

Respecto a un tratamiento de hospital de día, el flujo general sería el siguiente:

Evento HL7	Evento	Actor	Acción
SRM-S01	Creación de un	Facultativo	Solicitud de un tratamiento de Hospital
3KW-301	tratamiento	racultativo	de Día
SRM-S03	Modificación	Facultativo	Modificación de un tratamiento y
3KW-303	de Tratamiento	racultativo	planificación de las sesiones
SIU-S12*	Programar una	Administrativo	Citar una de las sesiones del tratamiento
310-312	sesión	Administrativo	Cital una de las sesiones del tratamiento
SRM-S05	Finalización de	Facultativo	Finalizar el tratamiento, anulando las
SIXIVI-303	Tratamiento Facultativo		sesiones pendientes

^{*} Se genera un mensaje S12 por cada sesión del tratamiento programada.

La anulación del tratamiento es:

Evento HL7	Evento	Actor	Acción
SRM-S04	Anulación de tratamiento	Facultativo	Anular un tratamiento

Página	6/38	Fecha impresión	05/12/2017

Para interrumpir y reabrir tratamientos, el flujo general sería el siguiente:

Evento HL7	Evento	Actor	Acción
SRM-S01	Creación de un	Facultativo	Solicitud de un tratamiento de Hospital
SKW-501	tratamiento	Tacultativo	de Día
SRM-S03	Modificación	Facultativo	Modificación de un tratamiento y
3KW-303	de Tratamiento	Tacultativo	planificación de las sesiones
SRM-S05	Interrupción de	Facultativo	Finalizar el tratamiento, anulando las

SRM-S05	Finalización de	Facultativo	Finalizar el tratamiento, anulando las
SIXIVI-303	Tratamiento	1 acuitalivo	sesiones pendientes

Sesión de Hospital de Día

En una actividad de hospital de dia, el flujo general sería el siguiente:

an and desirious se nespital se sia, et majo general seria et siguiente.			
Evento HL7	Evento	Actor	Acción
SIU-S12	Programación actividad	Administrativo Programar la sesión	
ADT-A04	Recepción del paciente	Administrativo	Registrar la llegada del paciente
ADT-A01	Inicio de la actividad	Facultativo	Registrar el inicio de la sesión de HdH
ADT-A03	Fin de actividad	Facultativo/ Administrativo	Registrar el fin de la sesión de HdH

Las anulaciones de estos movimientos son:

Evento HL7	Evento	Actor	Acción
SIU-S15	Anulación de programación	Administrativo	Anular la programación de cita
ADT-A11	Anulación de recepción	Administrativo	Anular la actividad registrada
ADT-A13	Anulación de fin de sesion	Facultativo	Anular el fin de actividad

Actividad de consultas externas en ámbito no ambulatorio

Cuando un paciente está ingresado o en urgencias, la actividad (visita) resultante de realizar la cita no será un episodio propiamente dicho, sino que se asociará al episodio del que depende:

Evento HL7	Evento	Actor	Acción	
ADT-A01	Admisión	Admisión	Registrar la admisión confirmada del	
ADI-A0I	Admision	Admision	paciente	
SIU-S12	Nueva cita	Administrativo	Programar la actividad	
ADT-A04	Recepción Administrati	Administrativo	Registrar la recepción del paciente que	
AD1-A04	del paciente Administra		acude a su cita	
ADT-A03	Fin de cita	Eggyltativa	Registrar la captura de la actividad realizada	
AD1-A03	Fin de cita Facultativo	racuitativo	en la cita, asociándola a la admisión	
ADT-A03	DT-A03 Alta A		Registrar el alta confirmada del paciente	

La diferencia entre el Fin de cita y el alta radica en:

- el ámbito nativo de la visita: PV1.PatientClass = O → Actividad de consultas externas

ļ	Página	7/38	Fecha impresión	05/12/2017

- el tipo de visita: PV1. Patient Type = $CE \rightarrow Consulta$ externa
- identificador de actividad: AlternateVisitID = código de cita

Las anulaciones de estos movimientos son:

Evento HL7	Evento	Actor	Acción
ADT-A11	Anulación de Admisión	Admisión	Anular el registro de Admisión
SIU-S15	Anulación de cita	Administrativo	Anular la programación de cita
ADT-A11	Anulación de recepción	Administrativo	Anular el registro de recepción
ADT-A13	Anulación de captura	Facultativo	Anular el registro de captura
ADT-A13	Anulación de Alta	Admisión	Anular el registro de alta

Reprogramación de citas

En actividad programada se puede necesitar cambiar la programación. Para ello, se seguiría el siguiente flujo:

Evento HL7	Evento	Actor	Acción
SIU-S12	Nueva cita	Administrativo	Programar la actividad
SIU-S13	Reprogramación	Administrativo	Cambiar la fecha prevista de la cita
ADT-A04	Recepción del paciente	Administrativo	Registrar la recepción del paciente que acude a su cita
ADT-A03	Fin de cita	Facultativo	Registrar la captura de la actividad realizada en la cita

La anulación de una reprogramación, se considera una nueva reprogramación, volviendo a la fecha y hora originales

IMPORTANTE: Solo se puede reprogramar una cita desde el sistema que la programó, ya que de lo contrario se podría generar inconsistencia, desincronización y errores en el sistema de gestión de citas.

Citas urgentes

En una consulta urgente puede obviarse la creación de cita y recepción del paciente, informando únicamente de la captura.

No acudir a cita

En el caso de que un paciente no acuda a la cita, el flujo es:

Evento HL7	Evento	Actor	Acción
SIU-S12	Nueva cita	Administrativo	Programar la actividad
SIU-S26	No acude a cita	Administrativo	Registrar que el paciente no ha acudido a la cita

Las anulaciones de estos movimientos son:

Evento HL7	Evento	Actor	Acción
SIU-S15	Anulación de cita	Administrativo	Anular la programación de cita
ADT-A13	Anulación de Captura	Facultativo	Anular el registro de captura no realizada

Página	8/38	Fecha impresión	05/12/2017

Modificaciones

El evento de modificación se lanza cuando se modifica algún dato que no genere uno de los otros eventos. El mensaje será el siguiente:

Evento HL7	Evento	Actor	Acción
SIU-S14	Modificación de cita programada	Administrativo	Modificar la actividad mientras está programada antes de la captura
ADT-A08	Modificación de cita capturada	Administrativo	Modificar la actividad cuando ya ha sido capturada tanto realizada o no.

Las anulaciones de estos movimientos son una nueva modificación, restaurando los valores originales.

Peticiones de cita

Las acciones que se pueden realizar sobre las peticiones de cita son las siguientes:

Evento HL7	Evento	Actor	Acción
SRM-S01	Nueva petición	Administrativo	Se crea una petición de cita.
SRM-S08	Modificación de petición	Administrativo	Modificar un petición de cita existente
SRM-S11	Borrado de petición	Administrativo	Borrado de una petición de cita
